Due to the texture natural of the stones, it is important that when they are grouted we try to cover the least amount of the pieces so as to make subsequent cleaning easier and prevent the joint from staying between the different textures.
Por el relieve natural de las piedras es importante que cuando se rejunte se trate de cubrir lo menos posible las piezas para facilitar la limpieza posterior y evitar que la junta se quede entre los diferentes relieves.
Lors du jointoiement, en raison du relief naturel des pierres, il est important de couvrir le moins possible les pièces pour faciliter le nettoyage ultérieur et éviter les restes de joints entre les différents reliefs.
