Due to the texture of the slates, it is important that when the are grouted we try to cover the least amount of the pieces so as to make subsequent cleaning easier and prevent the joint from staying between the different textures.

Por el relieve de las pizarras es importante que cuando se rejunte se trate de cubrir lo menos posible las piezas para facilitar la limpieza posterior y evitar que la junta se quede entre los diferentes relieves.

Lors du jointoiment, en raison du relief des ardoises, il est important de couvrir le moins possible les pièces pour faciliter le nettoyage ultérieur et éviter les restes de joints entre les différents reliefs.
