FLEXIBLE MATERIAL
Airslate is manufactured with a fibreglass layer which reinforces the structure, provides greater flexibility, and enables installation on curved areas with a radius of up to 35cm.

MATERIAL FLEXIBLE
Airslate está realizado con una capa de fibra de vidrio que refuerza su estructura y le otorga un amplio grado de flexión, lo que permite ser instalado en zonas curvadas con un radio de hasta 35cm.

MATÉRIAU FLEXIBLE
Airslate est fabriqué avec une couche en fibre de verre qui en renforce la structure et lui confère une grande capacité de flexion, ce qui permet de l'installer dans des espaces courbes d'un rayon pouvant aller jusqu'à 35cm.

Due to the texture natural of the stones, it is important that when the are grouted we try to cover the least amount of the pieces so as to make subsequent cleaning easier and prevent the joint from staying between the different textures.
Por el relieve natural de las piedras es importante que cuando se rejunte se trate de cubrir lo menos posible las piezas para facilitar la limpieza posterior y evitar que la junta se quede entre los diferentes relieves.
Lors du jointoiement, en raison du relief naturel des pierres, il est important de couvrir le moins possible les pièces pour faciliter le nettoyage ultérieur et éviter les restes de joints entre les différents reliefs.
