

PARADYZ 

TRI-D 

SINTERED STONE

SUPREME
QUALITY
INSPIRED BY
NATURE

TRI-D sintered stone is a **new category of products** by Ceramika Paradyż which delight with their natural beautiful designs. With **dimensions up to 160x320 and 123x320 cm** TRI-D sintered stones are revolutionizing the possibilities of architectural design. They combine natural beauty with durability, **made from 100% natural raw materials** such as quartz, feldspar, clay, kaolin.

Impressive resistance to scratches, discoloration, heat and chemicals make them a **practical choice for kitchen counters, windowsills, stairs, fireplaces or others**. Experience the unique design, functionality and superior quality of sintered stones.

UNIVERSAL APPLICATION

TRI-D sintered stone comes in two really **large sizes**, i.e. **160 x 320** and **123 x 320 cm** and in **two thickness values: 2.0 and 1.2 cm**. It is thanks to the tile size and unique properties that sintered stone is a highly universal material.

It is great **for kitchen tops and islands, wall and furniture cladding, window sills, floors or other elements** of modern and functional interior design. Its use is limited solely by the designer's imagination.

BEAUTIFUL IN EVERY DETAIL

Ceramika Paradyż is the first manufacturer in Poland and one of the few worldwide to manufacture TRI-D sintered stone 2 cm thick **with lines** visible both on the surface and **throughout the entire tile cross-section**.

Thanks to that, sintered stone may be machined using the technology used for natural stone, achieving similar, equally **decorative effect at the tile edge**.

ENTIRELY PRACTICAL

The precise manufacturing process allowed to create a really strong material. Sintered stone structure is free from any micropores thanks to which it **does not absorb moisture or dirt**, and all stains and soiling can be easily removed with a sponge and a mild cleaning agent.

It can be cleaned without any risk of damaging the tile or causing its discolouration. Its supreme **resistance to wear and scratching, UV rays or changes even during heavy everyday use** is confirmed by a **30-year guarantee** of the manufacturer (for details see the guarantee certificate).

RESISTANT TO TEMPERATURE

TRI-D sintered stone is resistant to extreme temperatures which makes it perfect for **fireplace cladding or kitchen tops** exposed to high temperatures. This allows you to place hot pots when you cook or use an induction cooker integrated with TRI-D sintered stone.

A practical modern function of 1.2 cm sintered stone is **the possibility to use induction systems integrated with the hob hidden beneath them**. Thanks to that, the kitchen top becomes a uniform, elegant surface easy to keep clean.

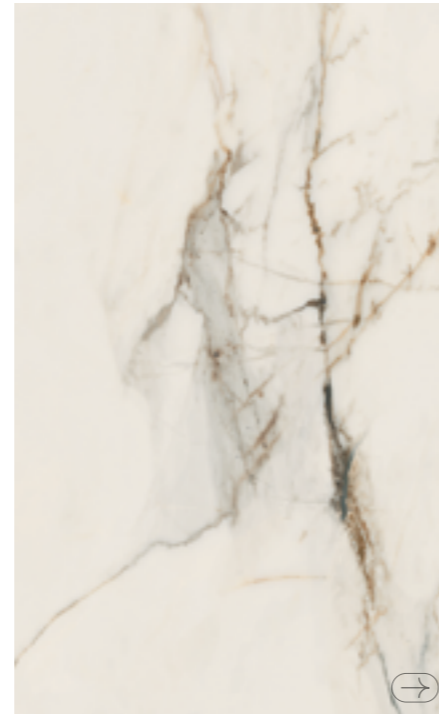

DESIGNS

soft, matt, brush / size: **123x320, 160x320 cm** / thickness: **2,0** and **1,2 cm**

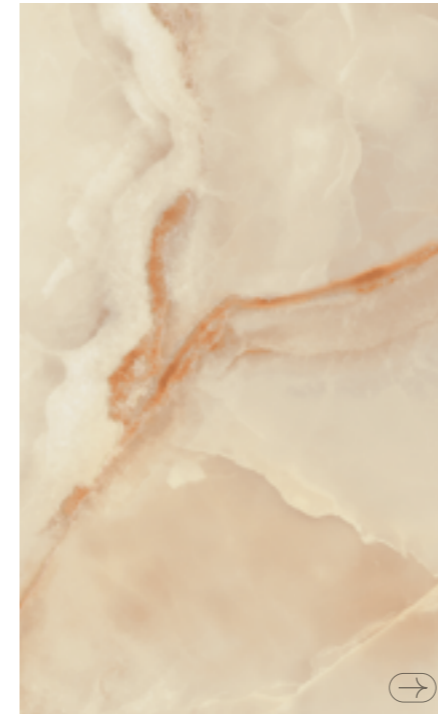

size
123 x 320 cm

HORIZON TRI-D GOLD / soft
123 x 320 cm / 2,0 and 1,2 cm
